**World's  
Fastest  
Kawasakis**

Feb. 18, 1981

Dear Sir,

Yes, we are still heavily involved with the Kawasaki triples. I guess you could say they were my first love in the high performance motorcycles. I have a special place in my heart for them because Kawasaki motors gave me one of the very first H1's in the U.S. to do research work on, and to race at Bonneville Salt Flats. When the H2's were released they again gave me one of the very first U.S. rights for R & D and we converted the Liner to H2 to set the FIM world land speed record at 261.00 MPH.

We have complete machine shop and welding service as well as 2 stroke porting. We specialize in H1-H2 Kawasaki porting and hop-up.

Enclosed is our catalog and price list. Feel free to call at any time we will be glad to pass on any information we have.

Yours truly,

BILL WIRGES

# Z1 SWING ARMS H2

☆ PRO STOCK ☆ STREET ☆ ROAD RACE ☆

Stop your swing arm twisting and ill-handling with the new SUPER STRENGTH "Bill Wirges, Inc." Swing Arms for Kawasaki Z1 and H2 models. These AMDRA approved units are constructed of the finest 4130 chrome moly steel, jig welded, and feature heli-arc welding throughout. Available in street, road-race, and pro stock lengths, or to your specifications. "Bill Wirges, Inc." Swing Arms feature our brass swing arm bushings, sliding aluminum axle blocks, threaded axle adjusters, and three shock mounting locations.

"Bill Wirges, Inc." also offers precision machined steel axles, aluminum axle spacers, and shock struts. These shock struts feature aluminum plugs in each end to prevent crushing when tightened down. Available in 10 thru 13 inch lengths.
